

What is the best way to improve chemical safety at your facility?

Choosing Watertech's FreedomPlus Drumless Delivery program, means you no longer have to monitor, handle, dispose of, or worry about potentially hazardous chemicals. Watertech shares the burden of meeting regulations and requirements — while eliminating spills, leaks, and other safety hazards associated with chemical handling.

FreedomPlus monitors tank levels to indicate when inventories are low. Watertech's trained specialists safely deliver and fill double-walled, heavy-duty, safety tanks and remove empty containers.

BENEFITS USING FREEDOM PLUS:

- Improved safety
- Minimize Spill Risk
- No chemical handling
- No chemical storage
- No drum disposal

Safety of employees and the environment are two of the most important concerns our customers have when dealing with chemicals in their facilities. **FreedomPlus Drumless Delivery** solves both!

All liquid boiler and cooling water treatments are available for delivery with **FreedomPlus**.
