

Is Your Water Healthy?

Focusing on safety delivers results.

Watertech has worked with healthcare systems for over 35 years to help minimize risk and improve water quality. We take a consultant's approach to problem solving, with patient/employee safety as our number one priority.

Watertech is a full service company and a resource for facility water management and infection control.

Boiler and Cooling Chemistries

- Scale and corrosion inhibitors
- Biocides
- Closed loop treatments

BlueVUE

- Compare water usage of your facilities and systems
- Monitor data through hourly reports
- Discover water and energy saving opportunities

Secondary Disinfection

- Monochloramine disinfection systems
- Chlorine dioxide
- Chlorine/ORP controllers

Water Management Programs

- ASHRAE SP 188 Compliance
- VHA Directive 1061
- CMS Compliance
- CDC Toolkit implementation

Point of Use Filtration

- .005 micron FDA approved filtration to retain waterborne pathogens. For sinks, showers, ice machines and medical devices.
